

3 Year Old Class

Having fun, learning, and making friends

Busy Lil' Saints

Hello Lil' Saints Families

Could you believe it's February already? It's a reminder that Spring is just around the corner as day gets longer and the weather gets warmer. February is a short month but it promises to be a very busy one for all of us.

January went by so quickly, the snow last week was a perfect surprise as we concluded our ice and snow theme. The children enjoyed playing with the snow, making snowballs, and snow angels. We even managed to make two baby snowmen. We are now ready for spring!

Sacred Heart School will be hosting an open house on Thursday, February 9th. This is a good opportunity for everyone to check out the school. All preschoolers are invited to attend "Ready, Set Learn" presentation by the two kindergarten teachers at Sacred Heart. It will be in room #100 at 5:30 PM. Lil' Saints will not be part of the open house this year. However, Mrs. Lock would be happy to set up an appointment for a private tour for any of your friends and family who might be interested in registering.

Valentine's Day Celebration

Being a good friend and being kind to one another have always been part of our values here at Lil' Saints. We will be focusing more on friendship and how to be a good friend as Valentine's Day approaches. Friendship activities for preschoolers is important for strong social growth. Starting from the first day of preschool, we try to always include friendship activities in our day.

We will be celebrating Valentine's Day on Monday and Tuesday, February 13 and 14th. The children are welcome to bring Valentine cards or small pre bagged treats to give out to their preschool friends. There are 20 children in each class. We ask that you leave the "to" part blank or just write "to my friend" instead of writing individual kid's names. This will make distribution so much easier!

Building and Construction

We will be learning about building and construction during the month of February. Children are always fascinated by big machines, tools and tall buildings. They are also natural builders — we always see them building and creating in different areas of our classroom. Through construction play, the children practice creative problem solving and engage in symbolic representation. They use their imagination by creating worlds that they can master and manipulate. By exploring physical attributes, the children gain an understanding of size, measurements and patterns. They experiment with balance, force and weight. They also learn concepts of more and less, part and whole.

HAPPY BIRTHDAY TO:

February Birthdays:

Oskar, Cali, Ben and Nash
